

**A barrier between patients and staff.
Manage aerosol release at the source.**

EXHALO Shield was designed to minimize the release of airborne contaminants and aerosol particles upon patient exhalation. EXHALO can be used with airborne or droplet-transmitted infectious diseases such as COVID-19.

EXHALO HIGHLIGHTS

- Works with many brands of oxygen or aerosol masks that utilize a metal nose clip
- Fits onto Adult and Pediatric aerosol, oxygen and tracheostomy masks
- Transparent shell
- When used in collaboration with hospital vacuum system, helps direct patient exhalation
- Enhanced protection for patients and clinical staff
- Lightweight
- Single patient use, latex and BPA free
